DETAILED ACTION

Allowable Subject Matter

Claims 22-41 are allowed.

The following is an examiner's statement of reasons for allowance: prior art, U.S. Patent # 7,250,814 B2, does not teach nor render obvious a variable gain circuit that has, in combination with other limitations, the direction of a gain change of the first amplifier with respect to a change of the first gain control signal, and direction of a gain change of the second amplifier with respect to a change of the second gain control signal are set in reverse to each other, and the first gain control signal and the second gain control signal are in common use; nor does it have a third amplifier having a third amplifier input and a third amplifier output, and being gain-controlled by a third gain control signal; nor does it have a gain control signal converting circuit for creating the first gain control signal and the second gain control signal from a fourth gain control signal; nor does it have an amplifier or an attenuator having a gain varying function, which is arranged at a preceding stage of the inputs of the first amplifier and the second amplifier.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patents # 7,250,814 B2, # 6,417,737 B1, # 6,958,649 B2, # 7,098,737 B2, # 7,102,444 B2 contain some limitations of the claimed invention.
